

WHEEL OF EXCELLENCE

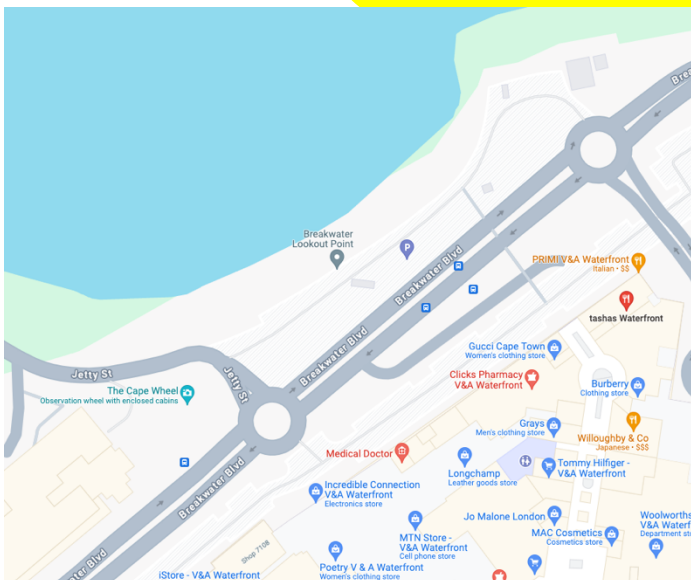

04

Framecore (Pty) Ltd started with the Wheel of Excellence project towards the end of 2022 and finished early in 2023. The scope consisted of moving / relocating the wheel from within the V&A to its new home next to the breakwater. The project took just over 4 months to conclude before ticket sales started coming in!

2023

The project works consisted of the installation of concrete piles (Keller) and extensive concrete beams and earthworks to accommodate the wheel structure. A specialist was brought in to erect the wheel whilst Framecore finished off the hard landscaping and ticket booth.

700 m²

The relocation of the wheel onto the +-700m² open field next to the breakwater was a collaborative undertaking from the start with the V&A Waterfront, Keller, RLB, LH Consulting, Jacobs Parker, Ecosafety and the rest of the team to ensure the relocation of this landmark happened within time and budget.
