

JOSHUA GENERATION CHURCH

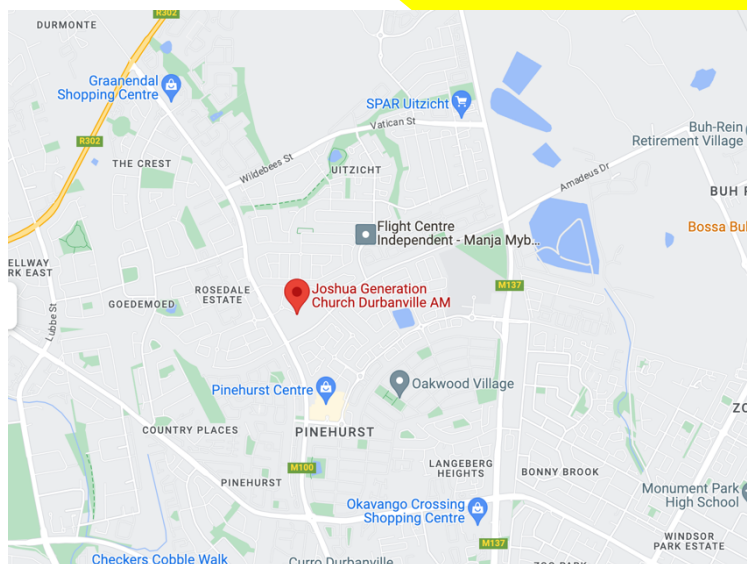

09

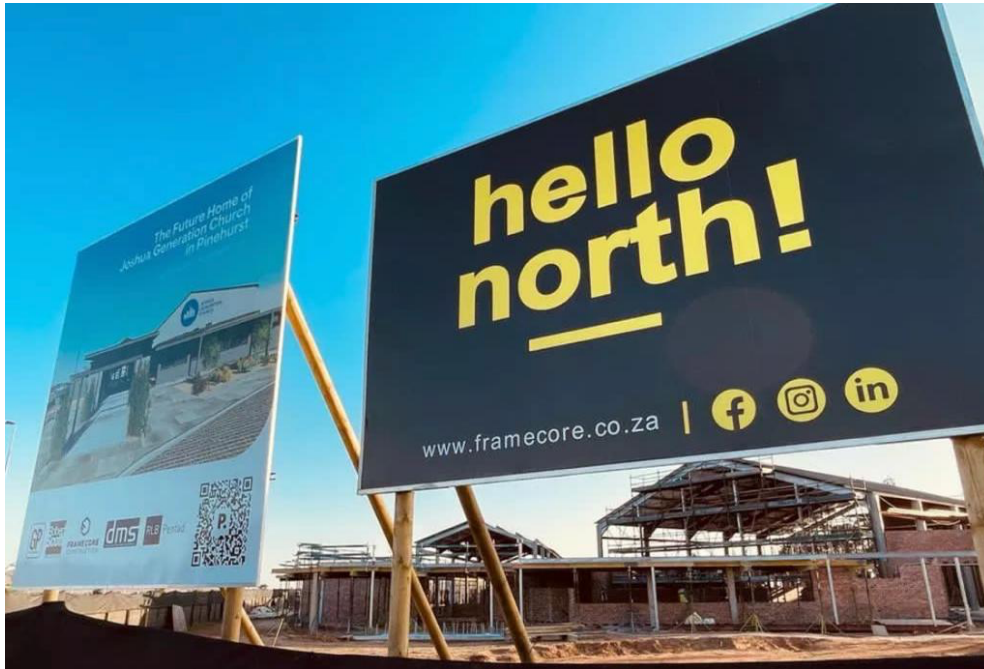

Framecore (Pty) Ltd constructed the Joshua Generation Church facility over a period of 9 months from January 2022 to October 2022. The building consists of an auditorium, hall, male and female ablutions, classrooms, cafe / coffee shop and external entertainment facilities with ample open parking.

2022

The project that was completed in 2022 is situated on the corner of Brackenfell Boulevard and Amadeus Drive in Durbanville Cape Town. The owners developed the facility with the aim of adding additional facilities in the future to accommodate expected growth.

The Joshua Generation project was a greenfield construction project, meaning out of the ground. The team involved in the project has many years of experience working together and were able to achieve an exceptional end result with value engineering, efficiencies and collaboration. This was also the first project for Framecore in the Northern Suburbs of Cape Town and opened the door for many other similar projects that followed after this JGC Project.

Framecore led the way on this project with fortnightly progress meetings, project management, programme management and quality control with the architect and engineers.

22 680

More than 22 000 man hours were spent on this project which was concluded without any accidents or incidents. Framecore takes safety very seriously on all projects with the aid of inhouse staff and trained professionals in the industry.

1400m²

The total footprint of the Joshua Generation Church project is 1400m², with the main part of the building boasting a 660m² auditorium. The project finishes are mainly exposed timber, polished concrete floors, exposed structural steel, exposed concrete soffits, carpet, vinyl and more.
